Minutes

Location: Shed
Date: Tuesday 6th March
Not In Attendance: N/A

Attendance: Dharius Robinson, Daniel Knox, Daniel Carl Beauchamp, Natalie Mclaren

What's Been Done since the Previous Meeting:
<Natalie M>:
- Adding material to corpus

<Dharius>:
- Battery document

<Daniel B>:
- API bug fix

Topics discussed:

- **Integration testing:**
    - Now that your PCBs have arrived, and Dan Knox has put together all the hardware, during this meeting we tested out our system with all components connected and inside its box.
    - We ensured that readings were being sent when expected
    - We need to double check the code and make some fixes
        - We also need to add more error handling
        - Add sensor power toggle functionality to reading process
        - Initialise getHardwareEui() for LoRaWAN setup for varying devices

What's Being Done:
- Finish up bug fixes
- Discuss poster fair - particularly what we think we should talk about

Further Discussion:
